WORLD
INSPECTIONS

AN INTRODUCTION TO SMALL
WORLD INSPECTIONS APP

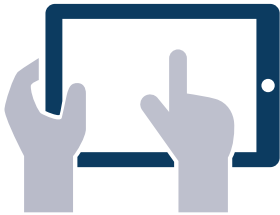

The Small World Inspections App is the latest inspection and risk assessment application for recreational areas & equipment.

- The latest and most detailed Indoor Soft Play Areas, Outdoor Playgrounds, Outdoor Gym Equipment, Multi Use Games Areas (MUGAs), Skatepark and Parkour Equipment Inspection system available
- Full European Standards built in to the Annual and Post Installation reports
- The Routine and Operational reports are simplified reports and suitable for the level of inspection required
- Separate Risk Assessment templates which enables any building or assets to be Risk Assessed

HOW IT WORKS

STEP 1

The Manager builds and schedules a report securely online on a desktop, with full control of the system and Inspectors.

STEP 2

Inspectors log in using an iPad and visit their assigned site. They record all data for the inspection through the application, noting condition, appearance, and potential risk. Photographs can be taken, and are attached.

STEP 3

When the inspection is finished, the file is completed by synchronising the app to the secure cloud server, where the report is held.

STEP 4

The Manager has the access to the data through a secure connection, and can choose to retrieve both summarised or detailed compiled reports in its completed form at any time.

STEP 5

The generated reports can be emailed or printed out locally, as required, reducing the need for paper storage.

Report Description

You are logged in as
Mel Campbell

3 OF 3

- Job: Ad Hoc Report
- Site: City Park
- Facility: Large playground
- Report Type: Risk Analysis
